INITIAL TECHNOLOGY OVERVIEW

This information is to guide in the development of a more specific and detailed Technology Information Request. Please answer the following questions for each Technology or Service provided.

What is the name of the technology or service you provide?

Describe how this technology is used in a larger Nutrient Management System. Please be as detailed as possible.

How many systems do you have installed on dairy farms or other livestock operations?

	Number of Sites	Size of Installations
Dairy		
Pork		
Poultry		

Do you have a preferred region or area for the location of projects?

Location of farm(s)?

What's the smallest and largest farm using your system?

Input and output of your unit/system – do you have a mass balance analysis?

If a mass balance is available, please attach or include as a separate document.

Input material description/characteristics:

For example: raw manure, digestate, screened digestate, suitable non-farm feedstocks, other.

Does the technology treat the full manure stream for a farm or a fraction of the stream?

Do you consider this a mature system or ongoing farm development?

Any weather constraints? Yes No *Please describe.*

Any bedding constraints? Yes No *Please describe.*

Output materials description and characteristics:

Please include the % of the total stream for each material, i.e. 10% fiber and 90% screened liquid by weight.

--	--

Do the Outputs of the process have a resale market identified? Yes No

If so under what brand name or who is the contract with?

Is this process scalable and to what extent (top and bottom limits)? *Please describe.*

Do you have a known scaling factor? *Please describe.*

Does this technology require any air input? Yes No

What is the preferred air connection? *For example: psi, fitting size, air quality.
If not distributed by the system please list each connected device.*

Does this technology require any water input? Yes No *If so, please describe.*

What is the preferred water connection? *For example: psi, fitting size, water quality, gpm.
If not distributed by the system please list each connected device.*

Does this technology require any electrical input? Yes No *If so, please describe.*

What is the preferred electrical connection? *For example: phase #, voltage, full load amps.
If not distributed by the system, please list each connected device.*

Does this technology require any mechanical input? Yes No *If so, please describe.*

What is the preferred mechanical connection? *For example: horsepower, connection, rpms.
If not distributed by the system please list each connected device.*

Does this technology require any special plumbing? Yes No *Please describe what is required.*

Does this system require and special foundations or pads? Yes No *If so, please describe.*

Do you consider this technology part of a larger system that you provide? Yes No *If so, please describe.*

Does your system require any other components that you do not provide or are not included in your proposal?

Yes No *If so, please describe.*

How is the system delivered to the site? *For example: skid mounted, assembled on site, constructed on site.*

Is this system portable or configured in such a way that it could be easily transported for use in several locations?

Yes No *Please describe.*

Has your technology been accepted by the NRCS and is it included into a practice standard? Yes No

Describe if necessary.

Are there any unusable or hazardous byproducts of this process? Yes No

If so, please describe the product and recommended means of disposal.

What spare parts and redundant components are included with the system?

How is the system controlled and what are the components and capabilities of the control system?

What is the usable life of the system?

What is the salvage value at the end of the usable life?

What is the educational and technical level of competence for the operation of the system?

What level of maintenance is required for the system?

Please indicate if rebuilds or major components must be replaced and what the frequency is for these components.

Are consumables used in the process? Yes No

Please provide the nature and purchase relationship for these consumables. For example: proprietary, special contract, generally available.

Can you provide an estimate of the capital required for the installation of this technology?

Please include all components and designate if provided by you or others.

Can you provide an estimate of the operational costs required for this technology?

Please include all costs and designate if provided by you or others.

Is there financing available for this system? Yes No *If so, what are the conditions for this financing?*

Is the system available for lease? Yes No *Please describe.*

What sort of warrantee or guarantee do you provide with this technology?

Do you provide any performance guarantees or strictly defects in parts and materials?

Explain how this system is unique or transformative and how does it improve upon or go beyond other technologies that are currently available.

Would you be willing to provide a location for a site visit by Newtrient? Yes No

If so, please provide location.

Technology References. Please provide customers with whom we can discuss this technology and its performance.
Include a company name, location, contact name and contact information.
