FLEXIBLE CLARIFIER & TANK COVERS

**AN AFFORDABLE, VERSATILE COVER
THAT WILL LAST FOR YEARS TO COME!**

CLARIFIER & TANK COVERS

IEC's CLARIFIER & TANK COVERS: AN AFFORDABLE, LONG-TERM SOLUTION

IEC is proud to introduce our brand new Flexible Cover – an effective and practical option for engineers and operators searching for a long-term solution at an extremely affordable price.

This versatile cover can be used on clarifiers and tanks of all sizes. It is constructed of industrial grade, U.V. protected geomembrane with anticipated service life of 15-20 years, offered in grey or green colors.

Custom-Made. Long-Lasting. Effective.

▲ HOW IT WORKS

Our Flexible Clarifier & Tank Cover are made to withstand destructive substances and designed for local wind, rain and snowfall conditions.

An industrial strength tensioning system provides tensioning from the interior of the cover outward, distributing the tension around the tank's perimeter to keep rainwater out and toxic emissions and odors in.

Each cover is custom-designed and manufactured to fit your specific needs. Regardless of the size of your clarifier or tank, our Flexible Cover will do the job economically and efficiently.

Manufactured with the best materials available and tested rigorously, IEC's Flexible Clarifier & Tank Covers are built to last for years to come!

IEC's FLEXIBLE COVER IS THE RIGHT COVER FOR YOU

We're committed to making sure that each of our clients gets the right solution for their application. Our experts are ready and waiting to hear more about your project.

ADVANTAGES & BENEFITS OF IEC's FLEXIBLE COVER

▲ KEEPS RAINWATER OUT

Our industrial-grade, UV-protected Covers keeps all rainwater out of your tank or clarifier. It also keeps condensate inside with a specialized flap that encircles the tank interior.

▲ EFFECTIVELY LIMITS EMISSIONS & ODORS

Not only does our Flexible Clarifier & Tank Cover keep water out, it also keeps noxious odors and emissions contained. We offer both gas-tight and semi gas-tight options.

▲ COMPLETELY CUSTOMIZABLE

Every Cover is custom-designed for you and includes numerous options, including viewing windows, sampling ports, scum beach access and a multitude of entrance access designs.

▲ EASY TO ACCESS

Should you need access to internal equipment for maintenance or sampling, IEC's cover includes closeable flaps for operator entry. If large internal equipment needs to be removed, the cover can be easily disassembled and most removed in a 1/2 day.

▲ LONG-LASTING

Our Flexible Clarifier and Tank Covers are virtually maintenance free with a service life up to 20 years.

TURN-KEY SERVICES – FROM DESIGN TO INSTALLATION!

At IEC, we provide full engineering service and support to all of our clients, starting with initial planning and continuing through installation.

When you work with us, you'll get:

▲ CUSTOM ENGINEERING & DESIGN:

When designing your clarifier cover, our experts ensure that every detail is included, right down to the smallest opening and pipe penetration. We provide full sets of details and drawings so that you can be sure your project is designed correctly.

▲ QUALITY MANUFACTURING:

All of our covers are created with state-of-the-art equipment with ISO certification and multiple Q/A & Q/C checks throughout the manufacturing process. We always use first grade, virgin material in all of our covers.

▲ EXPERT INSTALLATION:

IEC employs a full staff of experienced supervisors and welding technicians supported with a fleet of trucks and equipment trailers.

▲ DECADES OF EXPERIENCE:

With IEC, you'll receive the assurance the project is done right. We have provided covers to nearly 1,000 clients around the world.

Contact us today, and see for yourself why IEC is the leading provider of cover products for the municipal, industrial and agricultural markets!

At **IEC**, We ARE
the Cover Experts

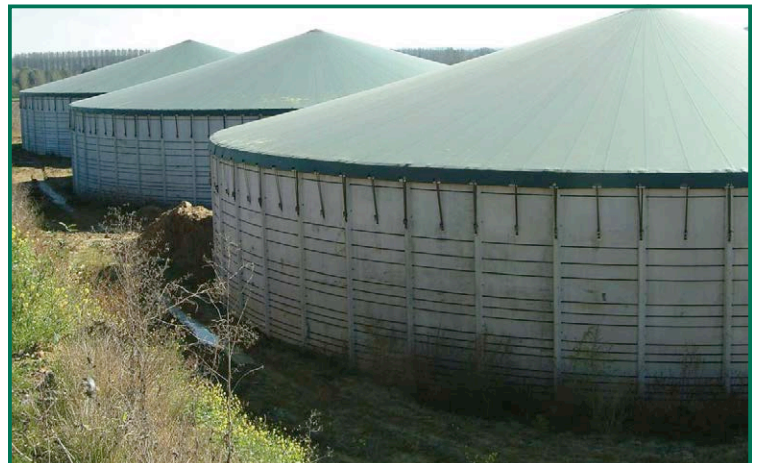

Industrial and Environmental Concepts (**IEC**) has been America's trusted cover designer and installer since 1993.

Clients from a wide range of industries and across four continents rely on our innovative cover designs and installations. That's because **IEC** engineers design each system to meet our client's specifications and operational requirements.

Our unique product designs and expertise provide the advantages you deserve and the quality you need. Our project management staff will work with you from initial design through installation.

We're proud to be a worldwide leader in the design, fabrication and installation of covers and liners.

We look forward to hearing about your next project!
